

Prenatal triptan exposure and externalizing problems in the Norwegian Mother and Child Cohort Study: a marginal structural model analysis

Presented by Mollie Wood

Mollie Wood is a fourth year doctoral student in Clinical and Population Health at the University of Massachusetts Medical School. Before beginning doctoral training, Mollie earned an MPH in Epidemiology from Boston University School of Public Health and a BA in Psychology and Zoology from Miami University. Her research interests include causal inference methods, reproductive and perinatal pharmacoepidemiology, and risk factors for childhood neurodevelopmental disorders.

Thursday, October 30th from 4 to 5 PM, Psychology Building A Room 109.
