

Assessing Primary Care Providers' Knowledge of Autism Spectrum Disorder (ASD)

The **Social Competence & Treatment Lab (SCTL)** at the Department of Psychology at **Stony Brook University** is conducting a study to better understand the knowledge **primary care providers have of ASD.**

We are seeking **primary care providers (physicians, nurse practitioners, and physician's assistants)** who work with individuals **under 22 years old** to complete an approximately 30-minute **online survey**. Participation is completely voluntary.

The **potential benefit** of the study is that the results will help researchers gain a better understanding of the **barriers primary care providers face in diagnosing and treating patients with ASD.**
